Our Vision

Within the next 15 years, no child should finish education without being familiarized to the Indian knowledge repository, with texts like Nāṭyaśāstra, Tarkaśāstra, Yogasūtra and Aṣṭadhyāyī; and without having accessed Itihāsa-Purāṇa.

Brhat is a Culture Engine.

We anchor our existence on our civilizational knowledge systems. We believe that our civilizational idea of education as bringing out the ‘perfection inherent in man’ is the kernel that can regenerate the planet. Our work spans 3 key pillars:

Culture Creatives

- Creative mass media to deliver to cultural yearnings
- Heritage discovery and experience travel
- Crafted brand/org. stories and narratives
- Culture-led design thinking frameworks, methods, principles

Policy Research

- Authentic knowledge banks and curriculum frameworks based on IKS
- Policy research on ecology and education to generate cultural currency
- IKS-led NEP consulting

Leadership Development

- Learning and courses for civilizational leadership
- Culture-rooted thought models and process principles for leadership
- Networking and match-making for rising entrepreneurship with cultural cogitation

Our Work in Education

The application of IKS throughout curricula is essential to the preservation of our civilizational memory.

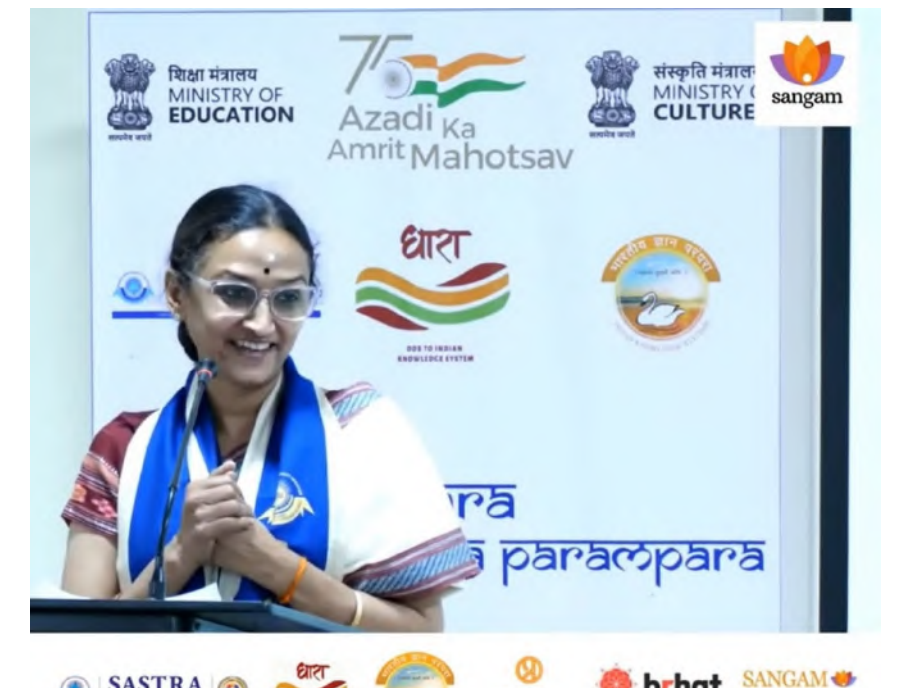

We partner with public and private institutions on IKS implementation, participate in and facilitate programs, and undertake awareness activities. We believe that the IKS (Indian Knowledge System) is critical to reimagining how multiple strands of knowledge are viewed. We focus on 4 areas:

Curriculum Building

NEP-IKS Implementation

Competency Development

Learning Design

Brhat as a Partner

For Individuals

Our writings and visual content, and travel discovery programs are tools of storytelling that detail all aspects of culture and history. Apart from this:

- We create a platform where creators can showcase their work and receive feedback, recognition and consumption
- We act as the enabling agent for individual creators and entrepreneurs
- Our consultation, networking and mentor-matching offerings are designed to be the grist for aspiring entrepreneurs

For Institutions

Complete scaling and perpetuation can happen through culture manifested at the organizational scale. This is how we bring civilizational operating systems to life. To do this, we provide:

- Culture-aligned frameworks for management, brand narrative and organizational design
- Consultancy on culture sensitivity and research for consumer communications
- IKS-informed curriculum building and NEP consulting
- Embodied cultural cognition in leadership
